

Retreat Outreach System: Team Guide

1. Why are we using this?

We have a list of over 70 Facebook groups and retreat platforms where we need to promote our March 2026 retreat.

- **The Problem:** Using a spreadsheet is messy. It's hard to track who we've messaged, what the group rules are, and which groups gave us the best leads.
- **The Solution:** This Obsidian "Second Brain" turns that list into a smart dashboard. It tells us exactly where to post next and keeps all our notes in one place.

2. How the System Works

The system uses "Properties" at the top of every note to track the status of our work.

- **status: To Review:** This means we haven't posted in this group yet. The note will stay on the **Dashboard** until this is changed.
- **status: Completed:** Once you post in the group, you change the status to this. The note will then "disappear" from the dashboard so we don't get cluttered.

3. Daily Workflow (Step-by-Step)

Step 1: Open the Dashboard

Go to the folder **00_Meta** and open the note called **Outreach Dashboard**. Make sure you are in **Reading View** (click the book/glasses icon in the top right). You will see a live table of every group that needs attention.

Step 2: Choose a Group

Click on a group name or the link directly from that table. It will take you to the Facebook group or the platform (like *Retreat Guru* or *Acro Yoga Sydney*).

Step 3: Post & Update

1. Read the group rules to ensure we can post.
2. Post our retreat details/link.
3. **Crucial Step:** Go back to that group's note in Obsidian.
 - Change **status: To Review** to **status: Completed**.
 - In the **Outreach Log** section of the note, check off the boxes for what you did.

Step 4: Track Progress

Look at the **Graph View** (click the "spiderweb" icon on the left).

- **Blue dots** are NSW groups.
- **Green dots** are QLD groups.
- **Red dots** are groups we still haven't touched yet. Our goal is to turn all the red dots into their regional colors!

4. Quick Tips for Success

- **Don't delete notes:** Even if a group isn't a good fit, keep the note and change the status to "Skipped." This way we remember why we didn't use it.
- **Add Notes:** If someone in a group comments with a lot of interest, copy their name into the note for that specific group so we can follow up with them later.
